

## Public Comment Voicemails

### Voicemail #1

Hi my name is Gregory Alexander. I live in the Westbrook subdivision calling to comment on the Greenway Bridge, and that entire project after hearing testimony, previous City Council meetings and reviewing the evidence brought together by a lot of experts, it's very clear that this is a very haphazard. Situation and the City Council long anything to be built or done anywhere near and around the rocky flats. Area is incredibly dangerous to the public, to the residents, local residents and being directly downwind from that puts me and my family in a lot of danger. So would like this to be project to be stopped would like this all work to be halted until there's enough scientific review to to justify it and prove that it's safe, and if that can't be obtained, then the project should be scrapped and the City of Westminster should not support or endorse this project in any way shape or form. For further comments or questions, I welcome any feedback. My phone number is [REDACTED]. Again, the Greenway Bridge project must be scrapped.

Hello, my name is Joan Dahl. I am calling to leave my input at the Greenway Bridge project. It's an absolutely horrible idea. I am a resident at Broomfield and I live downwind from the radiation that will be dug up to complete this project. I am very concerned about the well-being of myself, my family. Our friends and our pets please do not allow this project to continue. Thank you.

### Voicemail #3

Yeah. Hi. My name is Tanya Reynolds, and I live near this proposed Greenway Bridge project, and I understand that I can call and leave a comment here illustrating why this is a bad idea. And it's surprising that we even have to have a comment line for such a topic, but hopefully that is well visited and lots of our friends and neighbors will comment as well because this is a terrible idea. It's a disaster. We already understand that there's a lot of chemical fallout from the fire in the 50s and that a lot of people that worked during that time period got incredibly ill from the chemical exposures. And I think we need to listen to the professionals as much as possible in this and hear how dangerous this is for our bodies as well as the bodies of future generations to come and not disturb this land that has basically been destroyed by humans already. Period. So we definitely don't need to be kicking up any additional dust or products related to this incident and we need to leave it alone. Thank you.

Good morning. My name is Regyna R-E-G-Y-N-A Carbone C-A-R-B-O-N-E. I have been a resident in the City of Westminster for decades. The Greenway Bridge project deeply concerns me because of the items that will be dug up and we are downwind from that with all the decades long history of Rocky Flats. Please do not do the Greenway Bridge. Thank you kindly.
